

Palo Alto Networks

Enterprise firewalls, SASE, and endpoint and cloud security.

PA-7500 • representative hardware

Palo Alto Networks is a leading cybersecurity vendor known for next-generation firewalls and secure access. Massive IT designs, deploys, and manages Palo Alto Networks security for customers that need enterprise-grade protection.

A clear path to delivery

Product areas & practical applications

Product area	Practical application
Next-generation firewalls	hardware and virtual firewalls with application-aware policy
Prisma Access / SASE	cloud-delivered secure access for remote users and branches
Cortex XDR	endpoint and extended detection and response
Cloud security	protection for workloads in public cloud

When to talk to us

- Flat networks without segmentation or application control
- Remote users connecting through legacy VPNs
- Aging firewalls nearing end of support

Deployment & ongoing support

Massive IT designs firewall and access architecture, migrates policies from legacy platforms, deploys and tunes Palo Alto Networks products, and provides ongoing management and monitoring.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
