

Microsoft

Productivity, cloud, identity, and security platforms.

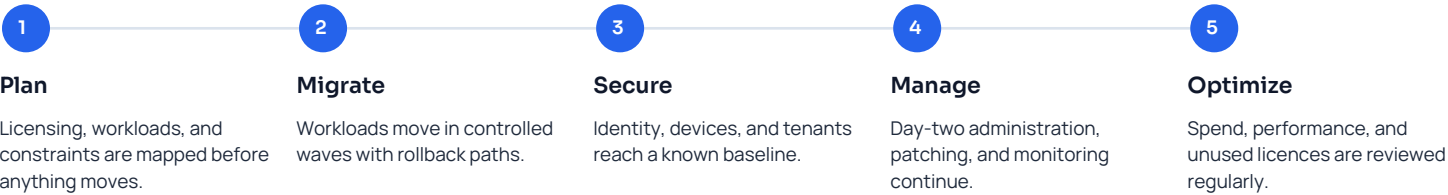

Service illustration • Cloud Microsoft

Customers usually come to Massive IT when their Microsoft environment has become too complex, unreliable, insecure, or difficult for their existing IT team or provider to manage. We design, deploy, secure, recover, and modernize Microsoft environments for organizations of every size, nationwide.

A clear path to delivery

Product areas & practical applications

Product area	Practical application
Microsoft 365	Exchange Online, Teams, SharePoint, OneDrive, and Teams Phone
Microsoft Entra ID and Intune	identity, conditional access, hybrid identity, and Autopilot device management
Microsoft Defender and Purview	endpoint, email, and identity protection plus data compliance
Azure and Windows Server	cloud infrastructure, Azure Virtual Desktop, hybrid and on-premises servers, SQL Server, and virtualization
Data, automation, and AI	Microsoft Fabric, Power BI, Power Platform, Dynamics 365, Copilot, and Azure AI

When to talk to us

- Microsoft 365 and Azure migrations, including physical-to-virtual and VMware to Hyper-V or Azure
- New deployments and modern workplace rollouts with Entra ID, Intune, Defender, and Autopilot
- Complex hybrid identity problems and legacy on-premises Active Directory issues or outages

Licensing & delivery expertise

Massive IT is a Microsoft CSP and holds the Solutions Partner designation for Cloud & AI Platform. Our engineers hold Microsoft and GitHub certifications. Microsoft 365 Business Premium is a typical starting point for small and midsize organizations; larger environments are scoped around actual requirements and existing licenses.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
