

Fortinet

Firewalls, secure networking, and security fabric.

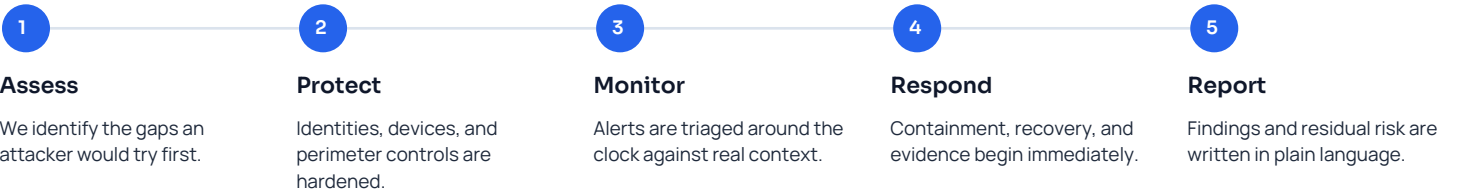

FortiGate 1800F • representative hardware

Fortinet's Security Fabric brings firewalls, switches, wireless, and centralized analytics into one platform that's managed as a single system. Massive IT designs, deploys, and manages Fortinet environments for organizations of every size – from single-site small businesses to multi-location enterprises.

A clear path to delivery

Product areas & practical applications

Product area	Practical application
FortiGate next-generation firewalls	perimeter, segmentation, VPN, and SD-WAN
FortiSwitch	secure switching managed directly from the firewall
FortiAP wireless	controllerless Wi-Fi with the same security policies as the wired network
FortiAnalyzer	centralized logging, reporting, and visibility
FortiManager	centralized policy and configuration management across sites

When to talk to us

- Expired or expiring licenses and renewals
- Configuration assistance and policy cleanup
- Capacity and performance problems – slow throughput, overloaded appliances

Support & licensing guidance

We assess, design, migrate, and manage the Fortinet fabric. Our engineers hold Fortinet NSE 4 certifications; we are a registered Fortinet partner. We generally recommend a 3-year license renewal with full FortiCare and support. Appliance sizing and current availability are confirmed against your workload.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
