

Business computing and printing.

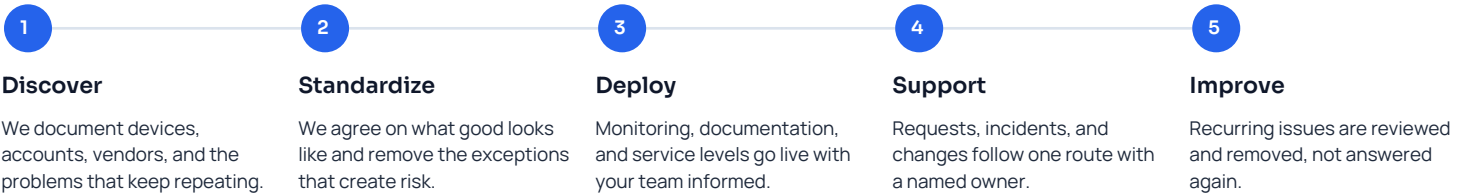

Service illustration • Managed IT

**HEWLETT
PACKARD**

HP provides business laptops, desktops, workstations, and printers used across offices of every size. Massive IT helps customers select, deploy, secure, and support HP devices so users get dependable equipment and IT gets a fleet that is consistent and manageable.

A clear path to delivery

Product areas & practical applications

Product area	Practical application
HP EliteBook and ProBook	business laptops with built-in hardware security features
HP Elite and Pro desktops	desktops, mini PCs, and all-in-ones for office environments
HP Z workstations	high-performance workstations for design, engineering, and data work
HP LaserJet and business printing	office printers and multifunction devices

When to talk to us

- Mixed, aging devices that are slow, unsupported, or out of warranty
- Printers and multifunction devices that cause constant help desk tickets
- Slow onboarding because every new device is set up by hand

Deployment & ongoing support

Massive IT handles HP device selection, procurement, imaging or zero-touch deployment, and warranty coordination. We bring new devices under management and security monitoring on day one and help standardize printing so it stops being a recurring support issue.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
