

Verkada

Cloud-managed physical security.

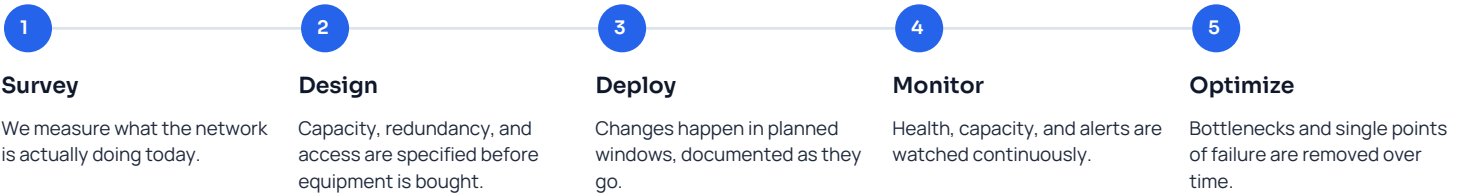

Service illustration • Networking Infrastructure

Verkada provides cloud-managed security cameras, access control, alarms, and environmental sensors in one platform. Massive IT plans, deploys, and supports Verkada systems so physical security is integrated with the rest of the IT environment.

A clear path to delivery

Product areas & practical applications

Product area	Practical application
Video security cameras	cloud-managed cameras with search and remote viewing
Access control	door controllers, readers, and badge access
Alarms	intrusion detection and monitoring
Environmental sensors	air quality, temperature, and vape detection

When to talk to us

- Aging DVR/NVR camera systems that are hard to access and maintain
- Multiple sites with separate, disconnected security systems
- Keys and lost badges instead of managed access

Deployment & ongoing support

Massive IT designs camera and door coverage, prepares the network and PoE switching, installs and configures Verkada devices, and helps customers set up users, permissions, and alerts.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
