Massive IT

TECHNOLOGY OVERVIEW

Acronis

Backup, disaster recovery, and endpoint protection.

Service illustration • Cybersecurity

Acronis

Acronis Cyber Protect combines backup, disaster recovery, and endpoint security. Massive IT deploys Acronis to protect workstations, servers, and cloud data with a single integrated tool.

A clear path to delivery

1. **Assess**
   We identify the gaps an attacker would try first.
2. **Protect**
   Identities, devices, and perimeter controls are hardened.
3. **Monitor**
   Alerts are triaged around the clock against real context.
4. **Respond**
   Containment, recovery, and evidence begin immediately.
5. **Report**
   Findings and residual risk are written in plain language.

Product areas & practical applications

Product area	Practical application
Acronis Cyber Protect	integrated backup and anti-malware protection
Disaster recovery	failover of critical systems to the cloud
Microsoft 365 and Google Workspace backup	protection for cloud productivity data
Endpoint protection	anti-ransomware and vulnerability assessment

When to talk to us

- Workstations and laptops with no backup at all
- Separate backup and security tools that don't work together
- Long downtime after server failures

Deployment & ongoing support

Massive IT deploys and configures Acronis, sets backup and retention policies, monitors jobs and protection status, and tests recovery.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
