

Veeam

Backup, recovery, and data protection for virtual, cloud, and SaaS environments.

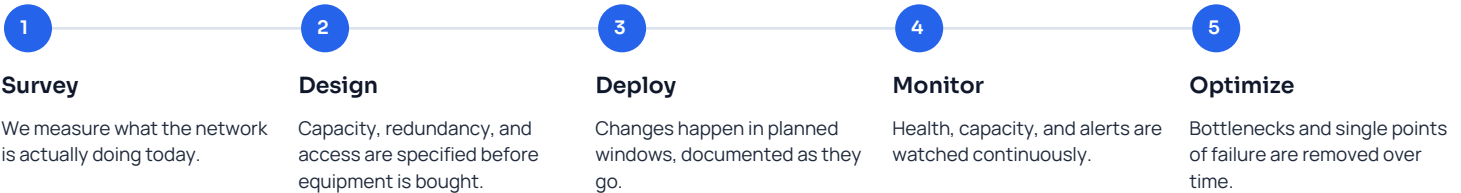

Service illustration • Networking Infrastructure

Veeam is a leading data protection platform for virtual, physical, cloud, and SaaS workloads. Massive IT designs, deploys, and monitors Veeam backups so customers can recover quickly from failures, mistakes, and ransomware.

A clear path to delivery

Product areas & practical applications

Product area	Practical application
Veeam Backup & Replication	backup and replication for virtual and physical servers
Veeam Backup for Microsoft 365	protection for Exchange, SharePoint, OneDrive, and Teams data
Immutable backups	backup copies that can't be altered or deleted by ransomware
Cloud backup and DR	offsite copies and recovery options in the cloud

When to talk to us

- Backups that are never tested — and fail when needed
- Ransomware that targets backup files
- No protection for Microsoft 365 data

Deployment & ongoing support

Massive IT designs backup strategies around the 3-2-1 rule, deploys and configures Veeam, monitors every job, and performs restore testing so recovery is proven, not assumed.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
