

Cloud Migration

Planned migration of workloads, files, and applications to the cloud.

HOW WE WORK

1

Plan

Licensing, workloads, and constraints are mapped before anything moves.

2

Migrate

Workloads move in controlled waves with rollback paths.

3

Secure

Identity, devices, and tenants reach a known baseline.

4

Manage

Day-two administration, patching, and monitoring continue.

5

Optimize

Spend, performance, and unused licences are reviewed regularly.

WHAT IS INCLUDED

- 01 Tenant assessment and hardening
- 02 Identity and access management
- 03 Device management and compliance policies
- 04 Workload migration planning and execution
- 05 Ongoing cloud administration

WHERE TEAMS GET STUCK

- Microsoft 365 licenses that are paid for but underused
- Inconsistent identity and device management
- Legacy servers that are costly to maintain
- Uncertainty about cloud security configuration

COMMON QUESTIONS

Do we need to move everything to the cloud?

No. We recommend the right mix of cloud and on-premises based on cost, performance, and compliance needs.

WHAT IMPROVES

- Secure, well-governed Microsoft environments
- Better return on existing licensing
- Modern, flexible infrastructure
- Simplified management
