

Juniper Networks

Routing, switching, wireless, and network automation.

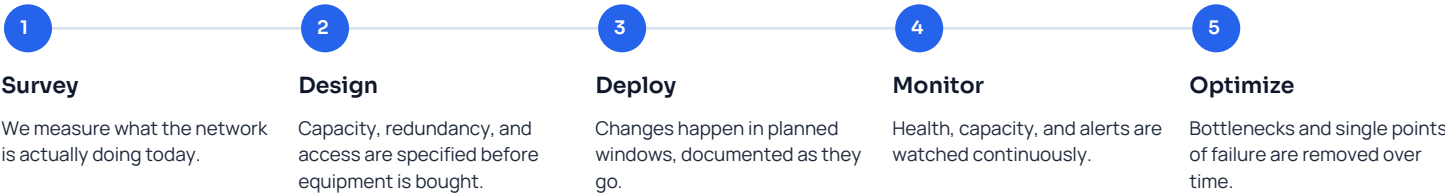

Service illustration • Networking Infrastructure

Juniper Networks, now part of HPE, builds routing, switching, and wireless platforms, including the Mist AI-driven management platform. Massive IT designs, deploys, and supports Juniper networks for reliable, automated operations.

A clear path to delivery

Product areas & practical applications

Product area	Practical application
Juniper Mist wireless	AI-driven Wi-Fi with cloud management
EX and QFX switching	campus and data center switching
MX and SRX	routing and security gateways
Mist AI operations	proactive troubleshooting and network insights

When to talk to us

- Network issues that take too long to troubleshoot
- Aging campus and data center switching
- Wi-Fi complaints without clear root causes

Deployment & ongoing support

Massive IT designs Juniper deployments, configures and migrates networks, and uses Mist AI insights to monitor and maintain them.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
