

LastPass

Password management, MFA, and identity security for businesses.

Service illustration • Cybersecurity

LastPass...|

Weak and reused passwords remain a leading cause of breaches. LastPass Business gives employees a secure vault for credentials with admin policies and shared folders. Massive IT deploys and manages LastPass for customer teams.

A clear path to delivery

Product areas & practical applications

Product area	Practical application
Password vault	encrypted storage for credentials, notes, and secure data
Shared folders	controlled credential sharing between teams
Admin policies and reporting	password policies, security dashboards, and user management
Multifactor authentication	an additional layer of sign-in protection

When to talk to us

- Passwords reused across accounts or stored in spreadsheets
 - Shared logins with no control over who has access
 - Offboarding that leaves former staff with saved credentials

Deployment & ongoing support

Massive IT rolls out LastPass, configures policies and shared folders, trains users, and integrates onboarding and offboarding into our help desk process.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
