

Proofpoint

Email security and security awareness.

Service illustration • Cybersecurity

proofpoint®

Email remains the most common way attacks begin. Proofpoint is a leading email security vendor protecting against phishing, malware, impersonation, and business email compromise. Massive IT deploys and manages Proofpoint protection for customer mailboxes.

A clear path to delivery

Product areas & practical applications

Product area	Practical application
Email protection	filtering for phishing, malware, spam, and impersonation
Business email compromise defense	detection of supplier fraud and executive impersonation
Email continuity and encryption	options for secure and resilient email delivery
Security awareness training	phishing simulations and training for employees

When to talk to us

- Phishing and fake invoice emails getting through to staff
- Executive impersonation and payment fraud attempts
- Cyber-insurance requirements for advanced email filtering

Deployment & ongoing support

Massive IT configures Proofpoint alongside Microsoft 365 or Google Workspace, tunes policies, reviews quarantines and threats, and pairs email filtering with awareness training.

Scope and licensing vary by environment. Product availability and support terms are confirmed during planning.
